

Let's begin designing your Personal Wedding website.

Listed below are the Wedding Website Pages for you to choose. All wedding website must have a Welcome Page to provide an introduction for your guests. Select 2 more pages that fit your needs for the base package.(3 pages) Scroll down the document and update the entire Personal Info section and then the Welcome Page that immediately follows. For each Page that you select, fill in the sections for the Pages titles. List the Photos that you would like on that specific page, give them a name on the back or if digital give the file names. We will try to select the appropriate size of the images and layout that make your site appealing. Lastly, enter the body of text that you want for each Page. Feel free to show how you want the text spread out, include a hand drawn layout of your page and we will try our best to accommodate. Add additional Pages to your website and include an additional \$50.00 per page.

Since photos can be very large files that need to be optimized for the web, send the photos on a diskette or CD and your check in the mail. If you only have printed photos, send them in the mail and we will scan them for you. Label them on the back to match the names you provide below with the page where it should appear. Include a self addressed stamped envelope to have photos, diskettes or CDs returned.

When your done, send this document back to us with your photos and check.

Checks should be made payable to Dennis Zanzano and mailed to:

Dennis Zanzano
208 Cranborne Lane
Cary, North Carolina 27519
